PROFESSIONAL EXPERIENCE

Junior Business Analyst (Product-Focused) | Zodopt Technologies | Bangalore, India

April 2025 – June 2026

- Standardized PRDs, BRDs, user stories, and acceptance criteria documentation, accelerating cross-functional delivery by 20%.
- Streamlined requirements analysis and competitive research turnaround time by adopting AI tools and prompt engineering.
- Facilitated Agile ceremonies including sprint planning, backlog refinement, and sprint demos to keep delivery on schedule.
- Built and sustained 95% stakeholder satisfaction across SaaS client engagements through structured check-ins and product demos.
- Increased sprint team velocity by 30% by sharpening requirement clarity and sprint prioritization.
- Collaborated with stakeholders and engineering teams to translate business needs into product requirements, user stories, and acceptance criteria.

Business Analyst Intern | Venpra Technologies | Bangalore, India

February 2025 – March 2025

- Documented business and functional requirements that supported CRM implementation and improved requirement clarity.
- Mapped AS-IS/TO-BE workflows with senior stakeholders, identifying opportunities for process and product improvements.
- Reduced back-and-forth between business and technical teams by producing clear requirement documents and wireframes for solution design.

Business Analyst, Founder's Office | Optimanage Software Private Limited | Chennai, India

December 2024 – February 2025

- Defined problem statements and feature requirements for an early-stage AI mental wellness MVP through structured user interviews and product discovery.
- Validated product hypotheses through user research, feature prioritization, user flows, and AI-assisted prototyping.
- Prioritized MVP features in partnership with the founder and tech team, balancing user value, effort, and go-to-market timelines.

EDUCATION

Bachelor of Engineering (B.E.), Electronics and Communication Engineering

2020 – 2024

Rajalakshmi Engineering College
