Business Analyst with ~1 year of experience building and delivering SaaS products. Hands-on in product discovery, user research, analytics, and Agile execution, translating business needs into scalable product solutions.

WORK EXPERIENCE

Zodopt Technologies

Bangalore

Junior Business Analyst (Product-Focused)

April 2025 – Current

- Implemented and supported **SaaS products** across multiple customer use cases, building strong understanding of workflows, configurations, and user behavior.
- Translated business requirements into **PRDs, BRDs, user stories, and acceptance criteria**, reducing ambiguity and enabling **20% faster delivery** across cross-functional teams.
- Led **Agile ceremonies** including sprint planning, backlog refinement, and demos, contributing to a **20% improvement in delivery speed**.
- Drove **stakeholder alignment** through regular check-ins and product demos, achieving **95% stakeholder satisfaction**.
- Improved **team velocity by 30%** by clarifying requirements and effectively prioritizing sprint work.

Venpra Technologies

Bangalore

Business Analyst Intern

Feb 2025 – Mar 2025

- Gathered and documented **business and functional requirements**, supporting CRM implementation and improving requirement clarity.
- Collaborated with senior stakeholders to map AS-IS/TO-BE workflows, helping identify opportunities for process and product improvements.
- Created requirement documents and basic wireframes that reduced back-and-forth between business and tech teams during solution design.

Optimanage Software Private Limited

Chennai

Founder's office – Product

Dec 2024 – Feb 2025

- Contributed to an early-stage AI mental wellness MVP by assisting in product discovery, user interviews, and problem definition.
- Turned user research insights into focused feature ideas and user flows to quickly validate product hypotheses.
- Worked directly with the founder and tech team to prioritize features for the MVP, balancing user value, effort, and go-to-market timelines.
