Profile

Business Analyst with 1.5+ years of experience in product discovery, requirements elicitation, stakeholder management, and Agile delivery for SaaS products. Scrum.org Certified Professional Scrum Product Owner™ I (PSPO I), skilled in translating business needs into PRDs, BRDs, FRDs, user stories, and acceptance criteria. Leverages Generative AI tools for research, documentation, and prototyping while building expertise in LLMs, RAG, AI Agents, SQL, Power BI, and Agile Scrum.

- Experience
- Junior Business Analyst (Product-Focused) - Zodopt Technologies

Apr 2025 – June 2026

 - Defined and standardized PRDs, BRDs, FRDs, user stories, and acceptance criteria, enabling 20% faster cross-functional product delivery.
 - Led requirements elicitation, stakeholder workshops, gap analysis, and AS-IS/TO-BE process mapping to translate business needs into scalable SaaS product solutions.
 - Collaborated with Project Managers, stakeholders, developers, and QA teams to refine requirements, prioritize backlogs, and support successful product delivery.
 - Facilitated Agile Scrum ceremonies, including sprint planning, backlog refinement, sprint reviews, retrospectives, and product demonstrations, ensuring effective sprint execution.
 - Improved sprint team velocity by 30% through clearer requirements, user story mapping, backlog prioritization, and strong stakeholder alignment.
- Business Analyst Intern – Venpra Technologies

Feb 2025 – Mar 2025

 - Gathered and documented business and functional requirements for CRM implementation projects, improving requirement clarity and stakeholder alignment.
 - Collaborated with stakeholders to map AS-IS and TO-BE processes, create wireframes, and support solution design and business process improvements.
- Founder's Office | Product Management – Optimanage Software Private Limited

Dec 2024 – Feb 2025

 - Conducted product discovery through user interviews, market research, and problem definition to identify MVP requirements for an early-stage AI mental wellness platform.
 - Collaborated with the Founder and engineering team to prioritize MVP features, validate product hypotheses, and design user flows using AI-assisted prototyping.
